Hey Rajesh,
The preview looks great. Here's my feedback:

- When a regular member account specifies a custom URL, does it always put them in http://illiusrock.com/ illiusrock-member/show/? I need to figure out what makes sense for RiotVine, but I guess http://RiotVine.com/username/custom-URL. Let me know if you think there will be any issues with doing this.
- I'd like the image used for the last.fm auto-created events to show up as the first image in the image gallery. This happens for user added shows, but not for auto-created ones.
- I need a better understanding of the venue search. Currently, when I type in Middlesex Lounge or Middlesex Lounge, Cambridge or Middlesex Lounge, Cambridge, MA, the results are all bars and clubs nearby but not Middlesex Lounge.
- Also, when I pick a result, it doesn't fill in all the information for the venue.
- Can you turn the venue information into a link to Google maps on the event page?
- When entering information into the venue field, is it possible to hit Enter on the keyboard and have it bring up the list of venues? Currently, hitting enter submits the form. I think some users will be trying to select a venue, hit enter and accidentally have their event submitted.

I believe that's all I've got. The streamlined event creation process is much, much nicer.

Thanks,
Kabir
